FOR IMMEDIATE RELEASE

**“THE BIGGEST LOSER” TRAINERS PRESENT JACKIE
CHAN STUDIO FITNESS AND XAVIX PRODUCTS TO
HOMETOWN TEENS**

*Interactive Fitness System a Big Surprise for Big Weight Loss on All-New Episode of NBC
Reality Hit*

SAN DIEGO (December 7, 2006) – SSD COMPANY LIMITED, makers of unique interactive sports and fitness applications, today announced that “The Biggest Loser” trainers presented the XaviXPORT and Jackie Chan Studio Fitness Applications to teens on the path to health and weight loss on a special episode of the NBC reality hit yesterday, Wednesday, December 6. The high school students, who reside in the trainer’s hometowns, received Jackie Chan Studio Fitness applications J-Mat and Power Boxing and the XaviXPORT as a reward for achieving set fitness goals.

“The Jackie Chan Studio Fitness package fit well with the show’s mission to encourage everyday Americans to take charge of their health by making exercise a regular part of their daily lives,” said Peter Newman, general manager, SSD COMPANY LIMITED. “The J-Mat and PowerBoxing applications help kids and adults enjoy cardio and interval-training workouts through a completely interactive fitness experience. We were thrilled to reward these hard working teens for making great strides towards health and wellness.”

The Jackie Chan Studio Fitness J-Mat and PowerBoxing applications were given away by “The Biggest Loser” trainers Kim Lyons and Bob Harper. In the episode, Lyons and Harper traveled to their hometown high schools and chose several students to help get in shape. The students that accomplished their designated fitness goals were given the Jackie Chan Studio Fitness package.

XaviX revolutionizes the way people are able to achieve a total body workout in their own living room with the J-Mat and PowerBoxing. The J-Mat is a wireless interactive fitness mat designed for the XaviXPORT that relays users’ movements directly onto the television screen. Different J-Mat programs let you run through the streets of Hong Kong as Jackie Chan, work out with Jackie in his Studio, or ‘Dash’ to determine how many steps you can

take in 10 seconds. JCS PowerBoxing uses wireless boxing gloves allowing users to punch, jab and weave their way through championship bouts or high-intensity training sessions. Both applications work with the XaviXPORT, which easily plugs into your television, turning any living room into an interactive home gym. Both applications track activity levels including exercise time and calories burned.

“These Jackie Chan Studio Fitness applications are fun and effective alternatives to traditional cardio routines no matter what your fitness goals may include,” said Newman. “We were thrilled to be highlighted on “The Biggest Loser” and are proud of the high school students who worked hard to see that their desired fitness goals were realized.”

Just in time for the holidays, fans of “The Biggest Loser” can incorporate the interactivity of XaviX into their own fitness regimens or give the gift of fitness to friends and family members looking for an exciting way to jumpstart their 2007 fitness goals. The XaviXPORT and J-Mat and Power Boxing applications can be purchased by visiting www.xavixstore.com. The Web site also has free downloadable cardio, interval and speed workout plans created specifically for each of the applications.

About the XaviXPORT System

The XaviXPORT is a revolutionary way to interact with your TV. XaviXPORT serves as the gateway for all XaviX applications enabling interactive home sports, fitness, entertainment and more. The system combines the latest in infrared, optical and radio frequency technology to see and respond to a user’s movements. XaviX has taken a completely new approach to system design by embedding the patented multi-processor, memory and human interface technologies into system cartridges. XaviXPORT comes equipped with a proprietary expansion jack to enable future hardware compatibility. As advances in technology enable new experiences, the XaviXPORT will never need to be upgraded.

About SSD COMPANY LIMITED

Founded in 1995 with a vision of bringing innovative, new-generation products into the world, SSD COMPANY LIMITED is a privately held technology company based in Kusatsu, Japan. SSD’s founding members include key development contributors for some of the industry’s leading home entertainment systems. In addition to XaviX sports and fitness titles, SSD is looking forward to the launch of additional lifestyle applications for its technology.
